

Dynamint® Udder Treatment

Organic Approved!

Dynamint is a true water in oil emulsion which delivers the potent properties of essential oils through the skin and into the soft tissue. Dynamint contains powerful peppermint, tea tree, eucalyptus and calendula oils, known for their antibacterial and conditioning properties. Dynamint's unique formulation results in the quickest delivery of the blended essential and precious oils deep into soft tissue where they are needed.

The non-greasy water-based cream is smooth, light and applies quickly and easily. Dynamint cream was formulated to penetrate by osmosis and not simply to remain on top of the skin like competitive products. Use Dynamint daily where you would other udder creams, confident in the knowledge that there is no better cream available!

- DH0500** Dynamint Hook Bottle, 16.9 oz./ 500 ml bottle.

Microfiber Dairy Towels

Coburn Microfiber Dairy Towels are soft, durable, reusable and absorb 7 times their weight in water. Our dairy towels are made of a microfiber which is finer than a strand of silk, allowing the cloth to reach into creases and crevices of the udder for a more thorough cleaning. The fabric does not kill bacteria but has the property of trapping up to 99% of the bacteria and holding it until washed out. Compared with cotton, microfiber is softer, more durable, more absorbent and dries faster. Hemmed towels are 12" X 12". Blue towels are a bit heavier in weight and texture than yellow towels.

- MDT-06-10** Blue Microfiber Towels, pack of 10 with label.
- MDT-06** Blue Microfiber Towels, bag of 50 with label.
- MDT-02** Yellow Microfiber Towels, bag of 50 with label.
