

# STOP flies in their tracks!

**Non-Toxic • Non-Polluting • Safe & Effective**

Sticky Roll™ effectively catches, controls and eliminates flies because it's based on their natural habits. Flies follow the warm updrafts in rooms and barns and seek resting places near the ceiling. They land on the Sticky Roll™ and become stuck in the glue. Once entrapped, the flies produce stress chemicals which are irresistible attractants to other flies. No baits, toxins, or pheromones are necessary. Soon the tape is black with dead flies. When a length of tape is full, crank it up, flies and all, onto the disposable take-up reel. Fresh tape is rolled out at the same time, ready to grab more flies.

Sticky Roll™ reel-to-reel Fly Tape System is available in several sizes, ranging from 600, 1,000, or 2,500 feet of tape, and features attractive, informative packaging.

## Super Size Deluxe Kit 2,500 ft. roll!

**SI2508**  
Super Size  
Sticky Roll Kit  
2,500 ft. roll

**SI2508** Super Size Sticky Roll Kit, includes 2,500 ft. roll take-up reel, handle, 6 pulleys, 6 ceiling hooks, all necessary hardware.

**SI2500** Super Size Sticky Roll Refill 2,500 ft. roll.

# Fly Control on a Roll

## Simple, Safe & Effective

- Non-toxic, environmentally sound
- Contains no insecticides or pheromones
- "Captured 92% of available flies." USDA Tests
- Easy to install; readily disposable

## Knocks Out the Fly Population

Unlike hanging fly ribbons, Sticky Roll™ is naturally attractive to flies. They look for thin surfaces to land on and they rise with warm updrafts toward the rafters of barns and enclosures. Flies land on Sticky Roll™ and become entrapped only to attract more flies. Soon the breeding population is virtually eliminated. Sticky Roll™ should be left in place for the entire fly season to protect against repopulation.

## Sticky Roll™ Deluxe Kit with Pulleys

For enclosures such as barns and arenas we recommend the Deluxe Kit. The Deluxe Kit consists of 600 or 1,000 feet of Sticky Roll Fly Tape, take-up reel, hardware, and three pulleys for installing a network of tape. For larger enclosures, such as freestall barns, we recommend the 2,500 ft. Super Sticky Kit. The Super Sticky Kit includes 2,500 feet of Sticky Roll Fly Tape, take-up reel, hardware, and six pulleys for installing a network of tape.

## Non-Toxic, Environmentally Sound

Sticky Roll™ is a specially designed glue tape on a roll. That's it. No added insecticides or attractants are required. It is environmentally friendly, non-allergenic, won't irritate skin if touched, and is easily removed with vegetable oil. Used reel is thrown away, flies and all.

## Constant Cost-Effective Fly Control

A dramatic alternative to spraying and fogging, Sticky Roll™ gives effective 24-hour fly reduction, without the constant work and mess.

Safe, effective, non-toxic Sticky Roll™ has an unlimited range of uses in any covered area where flies are a problem, including stables, dairy barns, swine and poultry enclosures, and animal premises of all kinds. Sticky Roll is also recommended for use in zoos, kennels, refuse areas, bakeries, canneries and factories.

Sticky Roll mounted with Hardware Kit.

When roll is full, empty roll becomes new take-up reel. Complete instructions are included.

## INSTALLATION

For best results, install tape within 6 inches of the ceiling above your fly population and away from breezes. For large enclosures install a pulley system in a pattern that best fits your space. Some installation suggestions are shown below:
